MULTIPACK

PAKKE- OG MERKESYSTEM

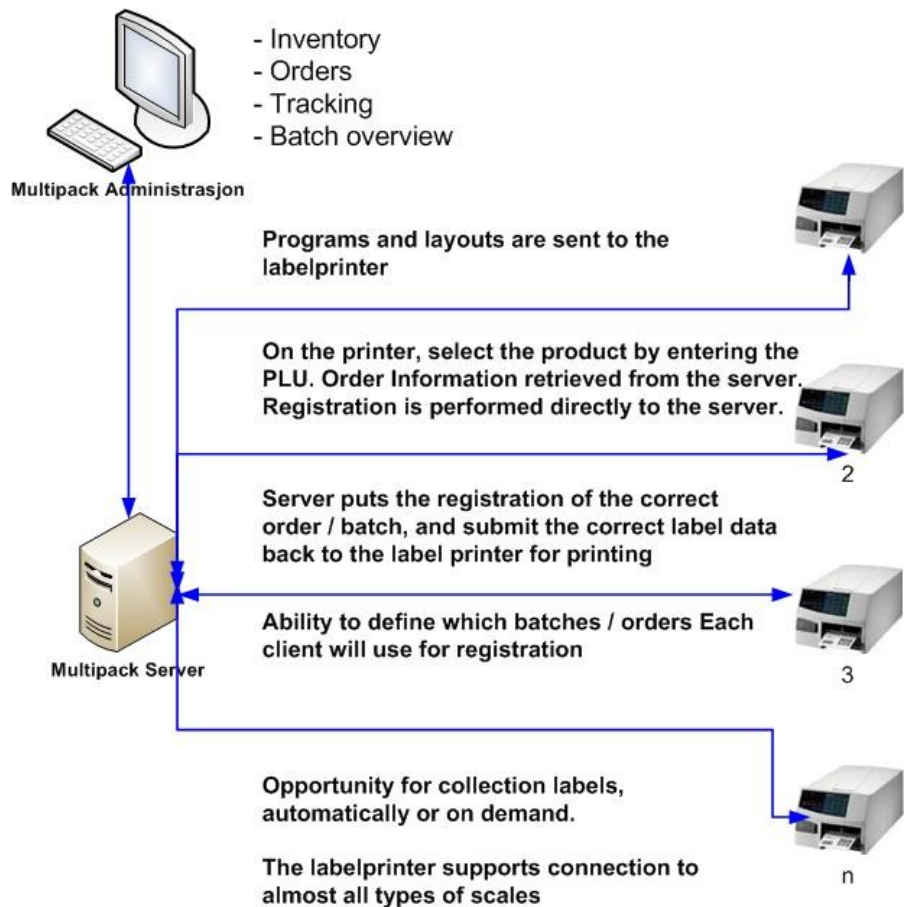

PrintMaster client

We have developed our software for Intermec label printers and made it possible to use the printer to control the weighing and labeling. Label printer works directly against Multipack server. No touch screens are required, only an Intermec label printer with or without scale attached. Multipack server supports many clients, and it is possible to also combine with advanced touch screens for advanced labeling in the production line.

See our website: www.multipack.no or call for more information:
